

## **SUPERFLAT SCREED HEAD OPTIONS**

Ligchine™ is pleased to offer the industry's largest selection of screed head design options. Don't settle for one style "fits all". Choose the option that is best for your applications and business.

Every Ligchine screed head will give you Superflat slab results and include these standard features:

- Two-piece adjustable plow for varying aggregates
- Long Life "hardened steel" augers
- Powder coat finish for easy cleanup
- Full range wireless control of vibration levels
- Extruded one-piece finish blade for increased strength and even vibration

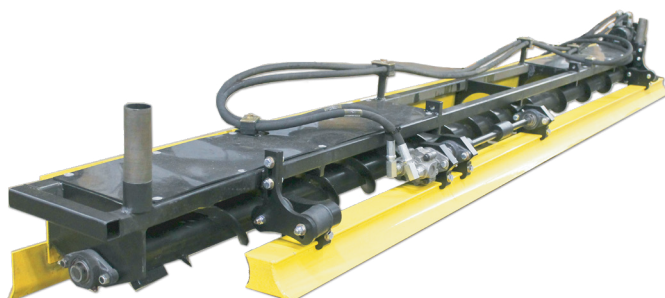

**Extruded Finish Blade Profile**

**GOOD**

### **STANDARD SCREED HEAD**

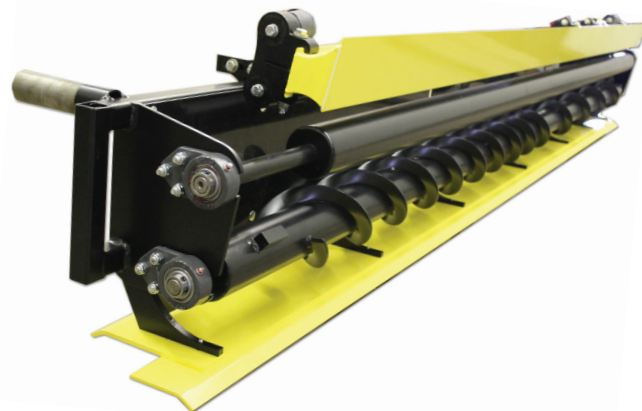

Great "all purpose" screed head that ships standard with every Ligchine screed. Includes the adjustable plow, double flight auger and extruded finish (vibration) blade. Available in varying lengths to match up to your choice of SCREEDSAVER™ machine.

**BETTER**

### **PAVER SCREED HEAD**

Upgrade to this head version and you immediately increase your application options. Paver screed heads add a powered roller to the standard plow, auger and finish blade features. Perfect for low slump mixes used in 3D paving and applications where fibers or other additives are included in the mix. Remove the finish blade and screed pervious concrete. Available in varying lengths to match up to your choice of SCREEDSAVER™ machine.

**BEST**

### **HIGH PERFORMANCE SCREED HEAD**

Optionally, you can upgrade to the most advanced screed head ever introduced to the industry. This head features a reinforced frame for increased rigidity and includes Ligchine's new "oversized, high speed, extra flighting" auger for superb results. User simplified adjustments insure faster resets for changes in mix, improved handling of oversized aggregate and increased consolidation due to a full-length vibration system. Available in varying lengths to match up to your choice of SCREEDSAVER™ machine.
