

SIDE-SHIFT SCREED HEAD

Every Ligchine™ screed head will give you superflat slab results and include these standard features:™™

- Two-piece adjustable plow for varying aggregates
- Long life “hardened steel” augers
- Powder coat finish for easy cleanup
- Full range of wireless control of vibration levels

The SCREEDSAVER ELITE™ features 12' (3.6m) auger screed head with hydraulically controlled lateral side-shifting ability for obstacle avoidance when screeding.

The key features of the side-shift screed head are:

- Adjustable plow to regulate concrete to auger
- Double flight auger
- Extruded vibrating finish blade
- Concrete additive spray bar
- Lateral side-shifting with 24 inches (60 cm) of travel controlled via wireless remote
